

Introduction /Agenda

The meeting of the HuMOCC took place at the Multinational Military Coordination Center (MNMCC) on Wednesday 13 May at 8.30am. The meeting agenda was the following:

Introductions

- Situation Update (OCHA)
- Canadian Military Presentation
- Update on Foreign Medical teams (FMT)
- Feedback from participants (issues, challenges, request for information, etc)
- AOB

Key discussion points

Situation Update

- A new earthquake measuring 7.4 magnitude struck today (12 May) at 12:50 local time (UTC +5:45). The epicentre was southeast of Kodari (Sindhupalchowk District), 76 km northeast of Kathmandu – an area already affected by the 25 April quake.

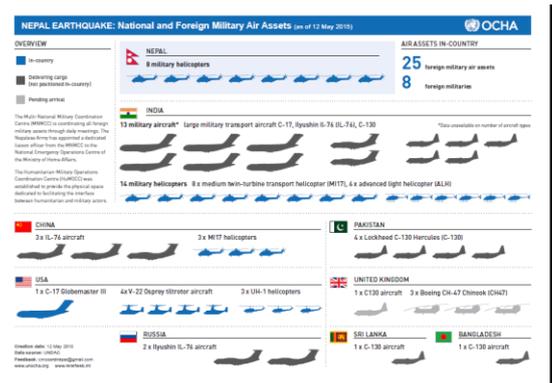

- Additional aftershocks ranging from 5.0-7.3 magnitude have occurred afterwards within 35 km of Kodari and a 6.3 magnitude one with the epicentre in Ramechhap District.

- Landslides were reported in Langtang

Region in the Himalayas. Overall, the area affected by the earthquake is prone to landslides which may further blocking roads and making transport difficult.

Road updates (Logistics Cluster information)

1. BP Highway connecting Bardibas, Mahottari to Banepa, Kavre district – Kathmandu. Road fractured in the Sindhuli-Nepalthok section of the route (54 km). Also landslide debris has been reported in different places of this road section.
2. Gorkha: from 10 km, a place in Mirkot VDC-Chhepetar-Bhaluswanra-Warpak VDC section (36 km) is obstructed due to debris from a landslide caused by the earthquake.
3. Dolakha: Charikot to Singati Bajar, Jhyaku VDC is open. However, the road is obstructed from Singati Bajar to Lamabagar VDC.
4. Dolakha: Route connecting the Tamakoshi-Milti Khola road in Dolakha district has been reported closed due to landslide debris at Bhirkot VDC, Dolakha district
5. Dolakha: the main road via Khadichaur, Sindhupalchowk district, Mude VDC, Municipality, Dolakha district is closed because of landslide debris at Kharidhunga, Lakuridada, Dolakha district.
6. Lamjung: Besishahar-Chame Highway (61.1 km) connecting Besishahar Municipality, Lamjung district to Chame, headquarters of Manang district has been obstructed at Taghrin VDC, Lamjung district

Update on air assets

The latest infographic on air assets was produced on 12 May 2015. It is available at the following webpage: <https://www.humanitarianresponse.info/en/operations/nepal/civil-military-coordination>

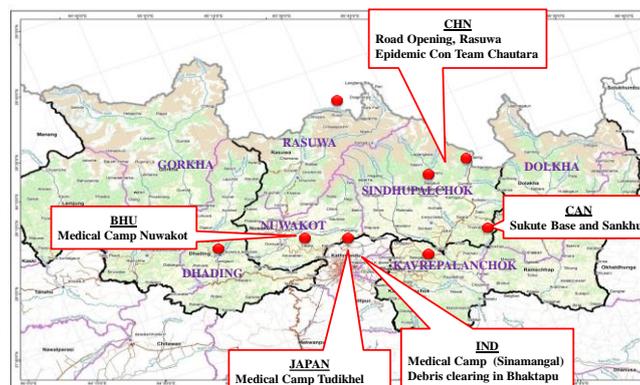

MNMCC Updates

As of 13 May, the Multinational Military Coordination Center reported that 1,405 people were rescued by air, of which 1,307 people were rescued by the Nepal Army. Another 1,050 people were evacuated by road

CURRENT DEPLOYMENT

Canadian Military Presentation

The Canadian military have their support base at Sukute. They currently have light engineering equipment available. These assets can be used to facilitate road opening and site preparation for the installation of Mobile Storage Unit (MSU). At the moment they are constructing a small camp at SANKHU.

The Canadian military is also providing airfield engineer support to WFP at the KTM international airport. The task is to conduct an assessment of what is needed to improve the new site for WFP helipad operations. The Canadian military have light medical capability to support medical requests coming from the local population. Support was also provided to CCCM for the assessment of potential IDP sites.

The "radio-in-a-box" is a project that the Canadian military is implementing in closed coordination with the Communicating with Communities (CwC) Group and the local radio Sindu. The project focuses on the delivery of radio and hand FM receiving devices that can be used to transmit agreed messages by CwC to local communities.

As part of their exit strategy, the Canadian will be handing over their support base to an NGO.
