**MOH**
Mudug Regional Medical officer has thanked the partners for supporting the vulnerable people in the community. He also noted how the cluster is significant to the ministry and ordered all the partners to be active member in the cluster.
RMO also highlighted any partner who will not attend the cluster to be deregistered from the cluster.
Also RMO encourage the partners to strengthen their coordination to the ministry.

**Stock balances (Nutrition Supplies)**
All the partners have adequate nutrition supplies and there is no stock rupture reported in the meeting.

4 **Knowledge/Experience sharing**
Importance of OTP performance indicators for the program effectiveness, monitoring and evaluation.
Here are the following 6 OTP performance indicators: Cure rate, coverage rate, defaulter rate, death rate, average weight gains and length of stay.

Cure rate is important for measuring out of the total discharged children, how many are cured. This is a direct measure of the program effectiveness.

Average weight gain informs the teams on how much g/kg/day was adding to the child Kg.

Length of stay is a direct measure of program efficiency.

To train the field staff on how to measure these indicators will give them ownership and awareness on their performance.

AOB

MOH have requested the partners to fulfil the below two orders.

1. Any recruitment process, the MOH should be part of it in order to make sure quality staffing in the district.
2. All partners to share training plans to the MOH before the planned training is conducted. Sharing training plans will aid the ministry to know the number of trainings conducted in South Mudug and draft it from quarterly report and share it in federal level.

MOH also noted that they will circulate Email to the base managers regarding the above orders.
