SITUATION OVERVIEW

1. Earthquake: Despite a decrease by 75% of IDPs living in camps, there are still 390,276 people (97,913 households) in the camps in the Ouest and Sud-Est departments, representing 4% of the Haitian population. 19% of them are threatened with eviction.

2. Cholera: Close to 170,000 new cholera cases are expected by the end of the year; about 35,000 new cholera cases have been reported since January 2012. Challenges remain in the integration of cholera into the health system; cholera care is largely provided by humanitarian actors facing challenges of increasingly limited resources.

3. Preparedness and response to emergencies, during the 2012 hurricane season: Haiti is vulnerable to multiple hazards (floods, earthquakes, hurricanes, tsunamis, drought). Despite registered progress, the emergency response capacity of the Government and Haitian civil society remains limited.

PROGRESS OF THE STRATEGIC OBJECTIVES

1. CCCM and Emergency Shelter: 95% of planned shelters built. 58% of targeted families have received return or relocation assistance. 500,000 people benefited from the construction of transitional shelters. Relocation programmes are currently underway.

2. Water, Sanitation and Hygiene: With CERF funding, the camps received minimum basic services in potable water; 23,000 people trained in hygiene promotion.

3. Protection: Mediation efforts of the cluster helped protect approximately 75,000 displaced persons facing threats of eviction. Out of the 722 residential facilities identified, 67 were accredited, 16,000 children were registered, 2,700 reunified.

4. Nutrition: 19,370 acutely malnourished children in care; capacity building of MSPP; capacity building of the health care structures over the whole territory.

NEEDS, TARGETS, ACHIEVEMENTS, REQUIREMENTS AND FUNDING BY SECTOR (09/08/2012)

Based on the four priority areas of the priority sectors: Health, WASH, CCCM and Protection / Emergency Shelter

HUMANITARIAN APPEAL (2012) 128m
HUMANITARIAN FUNDING (2012) 50.1m
FUNDING COVERAGE (2012) 39%
