1. **Introduction:**

On Saturday 23rd January 2017, DAMA team had visited Aljazaar Primary Health Care center in Hay Aljazzar in Mosul City.

The aim of the visit is to assess the Primary health care center for the purpose of infrastructures, Resources and health need assessment.

DAMA team visited the Primary Health Care center in Aljazaar and meet the Admin manager of the PHCC with 3 of non medical staffs.
2. **IDPs population:**

According to the recent information IDPS returnee number is increasing, families had been displaced from the city toward the safe regions in Khazir and Hasan Sham camps in the beginning of the military operations in October 2016, some of the families stayed in their home, DAMA team visited the PHCC and meet the Admin manager of The PHCC and other staffs who came back to work recently.

According to the people that we interviewed the total number of patients attending this PHCC was between 250 – 300 people/day, the PHCC services include the provision of Primary health care services including the prevention of communicable diseases and immunization services. The manager mentioned that the patients are coming to the PHCC but there is no doctor and no medical staff only one nurse.
3. **Water and Sanitation:**
The main source of water in the city is from the central water supply which is not functioning properly, the water pipe system of the PHCC need to be rehabilitated. Sanitation system is intact but need minor rehabilitation.

4. **Electricity:**
There is no national electrical supply because the main electrical distributor station of the city had been destroyed. There is one generator inside the PHCC but it will need supply with fuel.

5. **Building structure**
The building of the PHCC is intact, but all medical supply and non medical materials and devices had been destroyed.
6. **Medical supply needs:**

There is high need for medications especially for non communicable diseases, there will be need to renovate the building and supply with new non medical furnitures. There will be need to supply the PHCC with medical equipments and devices. Dental chair is needed the current one is not functioning properly.
7. **Recommendation**

- Supply the PHCC with Medication for communicable and non communicable diseases.
- Supply the PHCC with Vaccination.
- Supply the PHCC with basic medical devices.
- Supply the PHCC with Furniture and non medical equipments.
- Securing Fuel for the generator.
- Encourage DoH Ninevh staff to return back to their work, incentives for the staff.
- Rehabilitation of Aircondition system.
