**Introduction:**

On Saturday 23rd January 2017, DAMA team had visited Alsharqi Primary Health Care center in Hay Nabi Yunis in Mosul City coordinate 36° 20' 58.43" N, 43° 09' 36.20" E. The aim of the visit is to assess the Primary health care center for the purpose of infrastructures, Resources and health need assessment.

DAMA team visited the Primary Health Care center in Alsharqi and meet the following:

1. Representative of Mosul Municipality
2. Local Activist running the cleaning campaign for Mosul city from war remnants.
2. **IDPs population:**
   According to the recent information IDPS returnee number is increasing families had been displaced from the city toward the safe regions in Khazir and Hasan Sham camps, some of the families stayed in their home, DAMA team couldn’t access into the PHCC because it was still not cleared from bombs or mines.

   According to the people that we interviewed the total number of patients attending this PHCC was between 200 – 250 people/day, the PHCC services include the provision of Primary health care services including the prevention of communicable diseases and immunization services.

3. **Security and accessibility**
   The access the PHCC is from two sides main road, the region is not secured 100% and it is close to the front line of military activities near Dijla river and the right side of Mosul city which is still under the control of ISIS, there is still medium risk of mortar attack, sniper, suicide bombs.

4. **Water and Sanitation:**
   The main Source of water in the city is from the central water supply which is not function properly, the water pipe system of the PHCC need to be rehabilitated.
   Sanitation system is intact but need minor rehabilitation.

5. **Electricity:**
   There is no national electrical supply because the main electrical distributor station of the city had been destroyed. There will be need to supply the PHCC with generators.

6. **Building structure**
   The building of the PHCC had been burned and all medical supply and non medical materials and devices had been destroyed.
7. **Recommendation**

- Rehabilitation of the PHCC Building Structure (Doors, Windows, etc.)
- Supply the PHCC with Medication for communicable and non communicable diseases.
- Supply the PHCC with Vaccination.
- Supply the PHCC with basic medical devices
- Supply the PHCC with Furniture and non medical equipments.
- Supply PHCC with generator.
- Securing Fuel for the generator.
- Encourage DoH Ninevah staff to return back to their work, incentives for the staff.
- Rehabilitation of Aircondition system.
