**Doctors Aid Medical Activities (DAMA)**

**Bartella PHCC – Mosul City**

**Situation assessment report**

1. **Introduction**:

On Saturday 23rd January 2017, DAMA team had visited Bartella Primary Health Care center in Bartella city within Nineveh region, coordinate 36° 21' 16.35" N, 43° 22' 47.82" E. The aim of the visit is to assess the Primary health care center for the purpose of infrastructures, Resources and health need assessment.

DAMA team visited the Primary Health Care center in Bartella and meet the following:

1. Sub district manager
2. Bartella Mukhtar
2. **IDPs population:**
According to the recent information there is no IDPS returnee to the Bartella center only few families had returned mainly from the muslim group. Christian families had been displaced from the city toward the safe regions in Erbil camps since 2014, DAMA team couldn’t access into the PHCC because it was destroyed and there was no clear permission had been approved that the PHCC is cleared from mine or other bomb.

According to the people that we interviewed the total number of patients attending this PHCC was between 200 – 250 people/day, the PHCC services include the provision of Primary health care services including the prevention of communicable diseases and immunization services. The PHCC was receiving patients from the Bartella center and the surrounding villages with the following breakdown of the population

<table>
<thead>
<tr>
<th>Village name</th>
<th>Population (No. of person)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Shaquli</td>
<td>4250</td>
</tr>
<tr>
<td>Basighra</td>
<td>3000</td>
</tr>
<tr>
<td>Bazkirtan</td>
<td>1100</td>
</tr>
<tr>
<td>Tarjella</td>
<td>1000</td>
</tr>
<tr>
<td>Shekh amir</td>
<td>900</td>
</tr>
<tr>
<td>Badna Kabir, Badna Saghir</td>
<td>1250</td>
</tr>
<tr>
<td>Zahraa Khatun</td>
<td>850</td>
</tr>
</tbody>
</table>

As the Mukhtar stated that Christian people who making the majority of the population of the Bartella will not come back to their residents because of the following issues:
- No electrical supply
- No water supply
- No Health facility available or functioning
- Not safe yet and they need international guaranties for 100% protection.
3. **Security and accessibility**
   The access the PHCC is from one side paved road, the region is secured 100% and it is not close to the front line of military activities, there is still medium risk of suicide bombs.

4. **Water and Sanitation:**
   The main Source of water in the city is from the central water supply which is not function properly, the water pipe system of the PHCC need to be rehabilitated. Sanitation system is intact but need minor rehabilitation.

5. **Electricity:**
   There is no national electrical supply because the main electrical distributor station of the city had been destroyed. There will be need to supply the PHCC with generators.

6. **Building structure**
   The building of the PHCC had been 50% destroyed and all medical supply and non medical materials and devices had been destroyed.
7. **Recommendation**

- Rehabilitation of the PHCC Building Structure (constructions, renovation)
- Supply the PHCC with Medication for communicable and non communicable diseases.
- Supply the PHCC with Vaccination.
- Supply the PHCC with basic medical devices
- Supply the PHCC with Furniture and non medical equipments.
- Supply PHCC with generator.
- Securing Fuel for the generator.
- Encourage DoH Ninevh staff to return back to their work, incentives for the staff.
- Rehabilitation of Aircondition system.
