

Sector: Education

- a) Please briefly outline the current needs and gaps in the sector (linked to HRP and broad Allocation priorities) in the form of a narrative. **The allocation is in support of HRP 2018 priorities, with a focus on under-funded gaps across sectors to support (a) new arrivals (in locations not already covered under NHF Reserve Allocation 4) and (b) services in over-congested camp settings.** The allocation will also look to address issues of program quality and ensure access to funding for NGO partners.
- b) Clearly highlight key needs and gaps that need to be addressed by the sector and for which NHF support is proposed. Refer to assessments, surveys etc. when possible. As limited NHF funding is available it is important to focus on highly prioritized interventions.
- c) Describe the process within your sector in how you arrived at the above key issues and priorities.

Sector response:

Outline priority components / activity types to address the needs/gaps (prioritize max. 3 main activity types)	Location (LGA)	IDP Sites	\$ Requirements	Estimated number of beneficiaries
Total:				

Note:

- For priority components / activity types, we do not expect detailed activities, rather broader activity types (e.g for Health, the priority components might be a) primary health care, b) secondary health care etc. not more specific individual activities such as recruitment of midwives (for example);
- Consider feasibility of implementation and capacity of partners to carry out the activity;
- Consider locations (IDP sites) where implementation is immediately feasible;
- Consider prioritizing underfunded partners (with proven capacity) who have been working in the given locations ;
- Avoid inclusion of projects/activities for which resources are already available from alternate sources e.g. CERF funded activities; ongoing NHF funded activities; activities funded by other donors;
- List activities in order of priority and be prepared to articulate impact if certain activities are not funded.

1) Comments/remarks

Provide a justification for this funding request with reference to other fundraising efforts on behalf of the Sector.

Provide any other information/comments relevant to the discussion and decision-making regarding the funding gaps for envisaged response (e.g. impact of insecurity on information provided above, considerations regarding potential partner(s), or considerations regarding identified needs/gaps).

Sector response:
