

The ECHO-funded Consortium for the uptake of collaborative, quality multi-purpose grants

Objectives and Expected Results

To promote the use of harmonised multi-purpose grants (MPG) and evaluate their effectiveness in meeting basic needs in emergencies

Create an enabling environment: provide strategic leadership at the country level to facilitate MPG feasibility and appropriateness assessments, the integration of MPG programming into the humanitarian programme cycle and coordination platforms, and its consideration in strategic preparedness and response discussions.

Responsibility of OCHA and CaLP

Provide timely technical support to facilitate harmonised design of MPGs: deploy technical response teams to support programming in two selected responses; develop and adapt tools to benefit global development of MPG programmes.

Responsibility of DRC, Mercy Corps and Save the Children

Evaluate the efficiency and effectiveness of MPGs to meet humanitarian needs: develop an overarching framework for Monitoring, Evaluation, Accountability and Learning (MEAL); examine the catalysts and barriers to increasing the efficient and effective use of MPGs at scale.
