The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.

Estimated deaths as of 15 June 2017

SITUATION OVERVIEW

The June landslides, which started on 13th June with a few episodes, resulted in heavy loss of life (160 persons), injury (187 persons), and destruction of houses (6,000 structures) and other key infrastructures despite being localized in impact. It is the worst landslide-related disaster since 2007. It affected about 80,000 persons across five districts: Bandarban, Chittagong, Cox's Bazar, Khagrachari and, Rangamati. Among these people, 34,000 were severely impacted as they lost their houses together with their belongings, basic necessities, livelihoods and food stocks. Approximately 46% of the most affected persons are from Rangamati, 25% from Bandarban, 25% from Chittagong, 2% from Cox's Bazar and, 1% from Khagrachari.

While search and rescue interventions are ending, medical services are working non-stop to provide life-saving assistance. Central and local authorities are restoring road networks, power supply, and communication networks. Prices for basic commodities like fuel and water soared in the market due to scarcity of goods. The power shortages hindered access to water. Access to health, nutrition assistance, and life-saving intervention was initially limited due to road damage. Protection related concerns have also increased, in particular for children and women.

In the mid-term, the impact of this disaster could be also significant depending on the identification of secured areas for reconstruction of damaged shelter and infrastructure, the speed of reconstruction and rehabilitation work, and available support for the early recovery of the affected population. The specific context of the affected area as well as the fact that the monsoon season has just started is factored into the proposed response efforts. The Needs Assessment Working Group (NAWG) prepared a report that was shared with the Humanitarian Coordination Task Team (HCTT). Based on its findings, the HCTT agreed on the need to develop a 6-month Humanitarian Response Plan. The NAWG report and its recommendations are available on-line for consultation at the following link <https://vosocc.unocha.org>

STRATEGIC OBJECTIVES

- To provide life-saving assistance to those in life-threatening situations
- To reduce vulnerabilities and, to restore the safety and dignity of the most vulnerable populations
- To strengthen public services to meet with the increased demand for quality service delivery in a way that leaves no one behind

FUNDING

Complementing GoB's efforts, the HCTT is seeking US\$10 million to provide immediate humanitarian assistance to 51,000 people (45% men, 55% women, 51% children) for the next 6 months, mostly in the three most affected districts: Bandarban, Chittagong and, Rangamati.

RESPONSE BY SECTOR

COMMUNICATION WITH COMMUNITIES (CWC)

FUNDING REQUIRED: \$150,000

Target beneficiaries

	Female	Male	Total
< 18 years	1,300	1,300	2,600
≥ 18 years	1,200	1,200	2,400
Total	2,500	2,500	5,000

Criteria of selection

- Most affected populations living in temporary shelters and severely affected areas.
- Most affected households with vulnerable children and women.
- Vulnerable population at risk from further landslide in the affected areas.
- Affected population targeted by clusters in their respective response plan.

Rationale

The Chittagong Hill Tracts (CHT) in Bangladesh pose unique challenges to communication programming due to geography and diverse ethnicities. There are a multiplicity of indigenous languages; and cultural, regional and traditional practices. The NAWG report notes that affected populations, including children and women, need localised information and advice about self-help actions they can take – both immediately and in the longer-run to address particular needs and to make informed choices. Populations also need information about how to access relief being provided. In addition, bearing in mind the ongoing rainy season, vulnerable people in Chittagong, Rangamati, Bandarban and Khagrachari district need early-warning, safety and risk information related to landslide risk, in order to secure their lives and livelihoods in advance.

Shongjog members will disseminate key lifesaving information and self-help advice as well as supporting clusters to communicate with communities about their aid entitlement. Shongjog will also promote dialogues integrating multimedia based interventions with interpersonal communication techniques to assist populations at risk to stay safe from future landslides during the monsoon season. Activities will also include mechanisms that allow affected communities to provide input and feedback to relief providers in a coordinated manner, and ensure that these inputs are acted on where feasible.

Sector objectives

1. Share key lifesaving information and clear self-help advice to the most affected population in Rangamati district.
2. Support clusters to communicate with landslide affected communities about their aid entitlement/access, including explaining the process and criteria for beneficiary selection.
3. Ensure dialogue with population at risk in Chittagong, Rangamati, Bandarban and Khagrachari districts, enabling them to stay safe from the further landslide during the ongoing monsoon season.
4. Establish mechanisms for affected communities to provide input and feedback to relief providers in a coordinated manner, in order to ensure evidence based decision making.

Planned partners

CwC response will be led by Shongjog – the multi-stakeholder platform for Communication with Communities. Shongjog members will work with existing national and local partner organisations, including the Integrated Community Development Project (ICDP) in CHT, Bangladesh Betar in Rangamati and local CSOs in other affected areas.

Access in targeted areas

Several Shongjog members already have active programmes in the affected areas, with field presence. Relationships with other national and local actors in the target areas are already in place and will help to facilitate access.

RESPONSE BY SECTOR

CHILD PROTECTION

FUNDING REQUIRED: \$415,339

Criteria of selection

- Children without parental care
- Adolescent girls and boys
- Families who lost their homes

Rationale

An estimated 4,028 children have been affected. Of 78 Adolescent Clubs established in Bandarban district, 49 in total have been impacted. 11 clubs are severely damaged. A number of children are likely to become orphaned due to the death of any parents or both parents in landslide areas. Children are left unattended for longer hours in the shelters or in open space because caregivers are busy in restoring their livelihoods and shelter which heightens vulnerability. Adolescent Club activities could not be organized. Approximately 1,470 club members and peer leaders experienced restricted mobility due to the landslide, flash flood, and continuous raining. Children cannot attend schools. Boys and girls are not engaged in any productive activities which contributes to risk of school dropout, child labor, and trafficking. Continuous stress among children and adults to search for food, livelihood and shelters and cope with loss family members or individuals in their support networks.

Cluster objective

To facilitate better access of children to child protection services and bring the situation in normalcy.

Top-priority activities to complement GoB's efforts

1. Support and services to the children in the emergency shelter while they are unattended for longer hours;
2. Identify separated from the family and arrange special care and protection for them.

Target beneficiaries

	Female	Male	Total
< 18 years	1,300	1,300	2,600
≥ 18 years	1,200	1,200	2,400
Total	2,500	2,500	5,000

Planned partners

World Vision and Green Hill

 United Nations Children's Fund (UNICEF)

EARLY RECOVERY

FUNDING REQUIRED: \$1,200,000

Criteria of selection

- People who lost their house in the landslide and who have been displaced.
- Female headed households with several dependents.
- Families having disabled and or elderly family member's dependent on the main income earner, landless, daily laborers and small & marginal farmers.
- Families having school-going children at risk of school non-attendance and at risk of Sexual Gender Based Violence (SGBV).

Rationale

Right after the deadly landslide and torrential excessive rainfall (367 mm rainfall in 24 hours) all the upazilas surrounding the Kaptai lake of Rangamati have been inundated with flash floods. The fringe-land-cultivators on the banks of Kaptai Lake area, who can cultivate only one crop in a year, lost all their crops due to flash floods. Report of flash flood damages are just pouring in. Belaichari Upazila is one of the worst hit by flash flood. Government Upazila administrations are preparing reports of loss of crops and assets This will significantly impact on the livelihood and health condition of these communities. The landslides and flashfloods have totally disrupted the lives and livelihoods of the people of Rangamati Hill District – around 200 km road communication disrupted, rural infrastructure such as rural roads, walkways, culverts, footbridges, hampered the off-farm activities like weaving, handicrafts making, trading etc. and caused severe damages to the environment and ecosystem.

Cluster objective

1. To support the formulation of recovery plan, and cash grant support for the affected people especially ethnic women and small business holders.
2. To provide income opportunity through reconstruction of community infrastructures.
3. To identify gendered and protection needs (included for women and girls with special needs) and support short term and long term recovery

Target beneficiaries

	Female	Male	Total
< 18 years	16,830	9,180	26,010
≥ 18 years	11,220	13,770	24,990
Total	28,050	22,950	51,000

Current partners

UNDP, UNWOMEN

RESPONSE BY SECTOR

FOOD SECURITY

FUNDING REQUIRED: \$1,830,978

Target beneficiaries

	Female	Male	Total
< 18 years	7,314	7,858	15,172
≥ 18 years	9,002	9,733	18,734
Total	16,315	17,591	33,907

Criteria of selection

- People affected and/or displaced by the landslides or flash floods.
- Household living on day labour or charity and having no regular income, including landless people.
- Most vulnerable (pregnant, lactating women, elderly, chronically sick people, female headed household, disabled).

Rationale

Development indicators in CHT are consistently below the national average. Out of the 3 districts affected, Bandarban has been classified in Level 4 or Severe Chronic Food Insecurity (CFI). Rangamati has been classified in moderate CFI (Level 3) (Chronic IPC analysis, 2015). The severe chronic food insecurity is the result of the poor food consumption quantity, quality and high levels of chronic undernutrition. Nearly 70% children and over 60% women do not consume minimum diversified diets.

Livelihoods are characterised by low value livelihood strategies (providing inadequate and often unpredictable income) combined with high dependency on single livelihood and low literacy rates, which results in high poverty (27%). Chronic food insecurity is a persisting issue in the Chittagong Hill Tracts Districts as illustrated by the food crisis which hit Thanchi (Bandarban district) in May 2016 and the one in Sajek (May 2017) (Rangamati district). In terms of impacts, it has been reported widespread damage to food stocks of the affected families and non-availability of cooking facilities, liquefied natural gas and dry firewood in the local markets (UNICEF, Flash sitrep #2). Food supplies are also dwindling as access to markets is limited. The price of essential commodities like rice, lentils, oil, and vegetables is also rising (UNRCO, Flash Appeal, #3).

Due to landslides, crops and homesteads, vegetable and fruit gardens were inundated resulting economic loss and uncertainty in the livelihood of the affected families: Bandarban: 266 ha (summer vegetables, Jum field, orchards of mango, papaya and banana); Rangamati: 1,899 ha (estimated figures by Department of Agriculture Extension – DAE), Chittagong: 1020 ha (D form). The impact of the disaster on poultry is also significant (over 90 poultry farms are completely damaged in two upazilas in Rangamati district and 248 in Bandarban district for a total of around 339 farms). Crops are damaged, which means areas will plunge into food insecurity crisis imminently. Typically, women and girls are most severely impacted, particularly pregnant and lactating mothers. Remark: The impact on fish ponds is not yet measured.

Cluster objectives

1. Provision of food assistance package to the most vulnerable households to cover immediate food security needs for three months.
2. To support urgent restoration of livelihood opportunities.

Planned partners

Food Assistance: World Vision International, ADRA

Livelihood support: FAO

Access in targeted areas

FAO, WFP, Hellen Keller International and World Vision are currently working in CHT. INGO working in CHT still need to apply for FC-1 for the response. International staff should request an authorisation to visit CHT. Fast track authorisation should be granted.

RESPONSE BY SECTOR

GENDER-BASED VIOLENCE

FUNDING REQUIRED: \$400,000

Target beneficiaries

	Female*	Male	Total
< 18 years	1,300	100	1,400
≥ 18 years	10,500	1,100	11,600
Total	11,800	1,200	13,000

Criteria of selection

- Persons severely affected by flash flood and/or landslides.
- Women and girls of reproductive age (15-49 years).
- Persons at disproportionate risk of GBV including women, child-headed households, unaccompanied children, persons with disabilities, and older persons.

Rationale

Of the more than 40,000 people severely affected by the landslide and flood disaster in Chittagong division, over 70 percent (approximately 29,000) are concentrated in seven Upazilas across Bandarban, Chittagong, and Rangamati Districts. Approximately 11,800 women and girls in these areas are facing at particular risk of gender-based violence (GBV) as a result of the disaster (i.e. 1,300 adolescent girls, 10,400 adult women, and 100 over 65).

Separation of families and loss of life has compromised social safety networks in the households and communities. Displacement following landslide and flooding in both Rangamati and Chittagong districts has relegated several thousands of people to schools, government facilities, and cyclone shelters for refuge. Thousands are marooned by flood waters in the least accessible regions of the Chittagong Hill Tracts. Destruction of telecommunications, access roads, and electrical power lines caused by flooding in Chittagong and Bandarban districts doubly bars access to humanitarian aid, safe shelter, and life-saving services for the most severely affected (NAWG, Landslide Report, June 2017).

Even prior to the disaster, low utilization of government services, poor access to information, terrain and distance, and low decision-making power among women had been major deterrents to help-seeking, which is now exacerbating. Overcrowding, insufficient doors and partitions in sleeping areas, inadequate locks, and lack of privacy dressing and bathing in these large communal spaces introduces risk of sexual harassment or assault by inhabitants. Inadequate or partial distribution of fuel, food, and shelter building materials increases vulnerability for women and girls who may be forced to trade sex or other favors in exchange for these items (IASC, GBV Guidelines, 2015).

All combined, institutionalized referral systems for providing assistance to survivors of gender-based violence are broken in the affected regions. In this context, critical service needs include provision of GBV case management services to ensure safe, timely access to life-saving services, including provision of health care for sexual assault survivors.

Cluster objectives

1. Ensure survivors of GBV have safe access to health care, basic psychosocial services, and community-based support networks.
2. Mobilize community-led mechanisms that prevent and mitigate gender-based violence.
3. Deliver dignity kits and risk reduction materials to women and girls.
4. Increase community information and awareness regarding available GBV-related services.

Planned partners

UNFPA, Action Aid

Access in targeted areas

UNFPA and Action Aid maintain field presence in the affected areas. Relationships with other national and local actors in the target areas are in place and will help facilitate access.

GBV Cluster Coordinator

United Nations Population Fund (UNFPA)

zariv@unfpa.org

* Target inclusive of adolescent girls (ages 15-18)

RESPONSE BY SECTOR

HEALTH

FUNDING REQUIRED: \$1,894,000

Target beneficiaries

	Female	Male	Total
< 18 years	7,176	7,737	14,913
≥ 18 years	13,034	14,053	27,087
Total	20,210	21,790	42,000

Criteria of selection

- Most severely affected
- Pregnant, lactating and their newborn
- Chronically ill

Rationale

Devastating landslides affected about 80,000 persons across five (5) districts: Rangamati Bandarban, Chittagong, Cox's Bazar, Khagrachari and, Among these people, 42, 000 were severely impacted as they lost their houses together with their belongings, basic necessities, livelihoods and food stocks. According to National Health Crisis Management Centre and Control Room's report, 160 people have been confirmed dead in this rain-triggered landslide; and more than thousands injured persons received treatment in local hospitals, shelters and community level. The emergency buffer stock is almost exhausted. Even before the landslides, Rangamati has some of the worst indicators related to sexual and reproductive health. Only 11% of the women deliver in health facilities and only 5% of pregnant women complete 4 antenatal care visits. Bandarban ranks as the district with the lowest skill birth attendance in the country – estimated at 2%. Reports suggested that in the affected areas, pregnant women are facing increasing challenges in poorly staffed health facilities.

It is concerning that thousands of population are still living under the open sky in the affected areas. Unhygienic settings and stagnant water in different parts of the villages may lead to water borne diseases such as diarrhoea, skin and eye infections and may be triggered up. For reducing mortality

and morbidity, emergency medicines such as, Inter-agency Emergency Health Kits, Cholera kits, Inter agency Reproductive Health Kits are needed at minimum. There is also urgent need for doctors including obstetricians and anesthetists, midwives and nurses to manage the public health situation in affected areas.

Cluster objectives

1. To provide emergency health care services to landslides- affected population in order to prevent loss of thousands of lives including prevention and control of outbreak of communicable diseases
2. To prevent excess maternal and new born mortality and morbidity in landslides- affected areas.
3. To provide prompt and quality clinical management of rape services provided to survivors in landslides- affected areas.

Planned partners

Directorate General of Health Services, (DGHS), WHO, UNFPA and other health Cluster partners

Access in targeted areas

Chittagong Hill Tracts is considerably inaccessible due to its geographical complexity and it is very difficult to avail health services for both healthcare providers and recipient. Rainy season will continue for about another two months in the country. Further heavy rain may cause more land slides in the affected area. Some of health indicators are lower in Chittagong Hill districts than the country average. With technical support of WHO, Chittagong divisional Health office developed a Health Sector Emergency Preparedness Plan for taking Minimum Preparedness Action (MPA) in the area considering Training conduction for emergency health forces at district and divisional levels, Stockpiling Inter-agency Emergency Health Kits, and strengthening coordination among the partners. Ministry of Health and Family Welfare activated more medical teams and asked Health Cluster's Support to manage the current situation. All the affected districts are UNFPA priority districts and has very close coordination with Ministry of Health and Family Welfare officials and Hill district council officials in the districts.

RESPONSE BY SECTOR

NUTRITION

FUNDING REQUIRED: \$165,000

Criteria of selection

- Children 6-59 months old in the Landslide affected areas.
- Pregnant and Lactating Women (PLW).
- Adolescent girls those are targeted by the Child protection interventions.

Rationale

Widespread damage to food stocks of the affected families, non-availability of cooking facilities LNG, (Liquefied natural gas dry) firewood in the local markets, together with likely increased exposure to communicable diseases like diarrhea and compromised health services might have impact on the nutrition situation in the longer term. People in shelters are receiving 2 meals of cooked food (kichuri) and flattened rice with molasses (Rangamati/Bandarban) or only 1 meal cooked and rice where cooking facilities are available. However, the cooked food is not always enough for everybody in the shelter specially it's may not be appropriate for young children. Markets are only partially functional without sufficient stock and high prices. A significant number of Para Centers (129) in three CHT districts are affected so the domiciliary services including routine follow up visits, nutrition counselling particularly by Para Workers to pregnant and lactating women is being hampered. There is a risk that the acute malnutrition rates will go up due to increase in communicable diseases and reduced access to food.

Cluster objective

To facilitate better access to community based essential nutrition services to the land/mudslide affected children under five years of age (U-5), pregnant & lactating women (PLWs) in the Chittagong Hill Tracts (CHT)

Planned partners

Ministry of Health & Family Welfare, UN-WFP, ICDP/MoCHTA, Green Hill.

Target beneficiaries

	Female	Male	Total
< 18 years	5,125	5,125	10,250
≥ 18 years	2,600	0	2,600
Total	7,725	5,125	12,850

Contact

SHELTER

FUNDING REQUIRED: \$3,000,000

Criteria of selection

- People who lost their houses or their houses were damaged in the landslide.
- Female headed households with several dependents.
- Families having disabled and or elderly family members dependent on the main income earner, landless, daily laborers and small & marginal farmers.
- Families having school-going children at risk of school non-attendance and at risk of Sexual Gender Based Violence (SGBV).

Rationale

The NAWG report informed that 5,000 homes vanished because of the landslides and the mudslides and more than 6,000 others were severely damaged. Consequently, an estimated number of 66,000 persons are living in unprotected and overcrowded emergency shelters or in the open. Some luckier ones are staying in the homes of relatives or friends. Eight hundred families in Rangamati and 500 in Bandarban have taken refuge in emergency shelters, including schools and public buildings. A total of 30 shelter homes have been opened in the hill areas to accommodate around 3,500 persons. Emergency shelter capacity is insufficient and life-saving emergency shelter assistance is critical for 6,000 households.

Cluster objective

- To provide emergency shelter assistance
- To support emergency shelter repair

Planned partners

Bangladesh Red Crescent Society, IFRC, UNDP, World Vision.

Target beneficiaries

	Female	Male	Total
< 18 years	10,890	7,290	18,180
≥ 18 years	8,910	10,100	19,010
Total	19,800	17,390	37,190

RESPONSE BY SECTOR

WATER SANITATION AND HYGIENE

FUNDING REQUIRED: \$849,660

Target beneficiaries

	Female	Male	Total
< 18 years	9,212	9,588	18,800
≥ 18 years	13,818	14,382	28,200
Total	23,030	23,970	47,000

Criteria of selection

- Mostly affected women headed households
- Mostly affected poor and ultra-poor households
- Mostly affected households with vulnerable children and women
- Mostly affected adolescent girls and women

Rationale

WASH infrastructure were damaged due to the landslides in the affected areas of Chittagong Division. In Rangamati, a total of 192 tube wells, 172 ring wells, and 323 sanitary latrines were damaged. In Bandarban, approximately 500 ring wells and deep tube wells were inundated by mudslide and partially damaged. About 450 Katcha latrines were partially or fully damaged in the affected upazillas. In Khagrachhari about 72 ring wells and deep tube wells and 64 latrines were reported damaged. People including children, women and adolescent girls living in 29 shelters (19 in Rangamati and 10 in Bandarban) are badly in need of drinking water supply and sanitation facilities as the shelters were not equipped with adequate WASH facilities. Women and adolescent girls are most vulnerable to access to sanitation in terms of privacy and security since there are no sex segregated latrines in the shelters. The present situation of poor access to WASH facilities could lead to outbreak of water borne diseases if not promptly addressed.

Cluster objective

1. To meet the humanitarian WASH needs of ensuring access to safe drinking water, improved sanitation facilities and hygiene practices for the most affected population of Rangamati district.

Planned partners

Department of Public Health Engineering (DPHE), Integrated Community Development Project (ICDP), UNICEF and BRAC

Access in targeted areas

DPHE, UNICEF and BRAC are already providing WASH humanitarian response in the affected areas using their own structures for delivery of services.

Contacts

Bisi Agberemi
WASH Cluster Coordinator
UNICEF Bangladesh
bagberemi@unicef.org

CROSS-CUTTING ISSUES

Beyond the priority sector response plans, humanitarian actors in Bangladesh have focused on a joint approach to several key issues:

Humanitarian Principles

The HCTT will implement the response according to humanitarian principles and the highest sense of ethics notably in communication products.

Gender in Humanitarian Action

The HCTT will promote the mainstreaming of GiHA principles in the implementation of the response.

Community Engagement

The HCTT will involve affected communities in the design, planning, management, implementation and evaluation of programmes. The HCTT will also seek feedback from the communities on the implementation of the HRP.

Government Ownership

The HCTT will promote GoB's leadership of the cluster/sector responses.

COMMUNICATION AND ADVOCACY

During the 6-month implementation period of the response plan, the Humanitarian Coordination Task Team (HCTT) will issue a monthly SITREP to report and to update the international community on the needs, the response and gaps. The HCTT and its partners will advocate for issues directly related to the humanitarian response but also on addressing issues related to the causes of the disaster in order to help prevent future possible loss of lives.

RESOURCES MOBILIZATION

HCTT Members will circulate the HRP to their partners. The objective will be to mobilize the required funding for allowing the much-needed comprehensive multi-sectoral assistance. The second objective will be to expand the donors' base to non-traditional donors for humanitarian activities in Bangladesh.

CASH ASSISTANCE

HCTT Members agree that cash assistance needs to respect commonly agreed packages and guidelines and that interventions need to be discussed with and supported by Cluster/Sector Leads/Co-Leads.

ACCESS

HCTT co-leads will support INGO partners working in CHT to receive relevant authorization to support response efforts.

IMPLEMENTATION AND COORDINATION

The Humanitarian Coordination Task Team (HCTT) that comprises the cluster/sector leads and co-leads will ensure the coordination and the follow-up of the implementation of the activities at the central level. In addition, a district area-based coordination system will be promoted to ensure a more integrated approach per affected district. Therefore, a humanitarian partner will be responsible for the coordination of activities in each affected district. These Agencies will work in close collaboration with the respective District Commissioners and help distinguish short-term and long-term needs and streamline communication to the HCTT. This area-based coordination arrangement will also have the advantage to provide both ways real-time information between the district authorities and the HCTT.

MONITORING AND EVALUATION

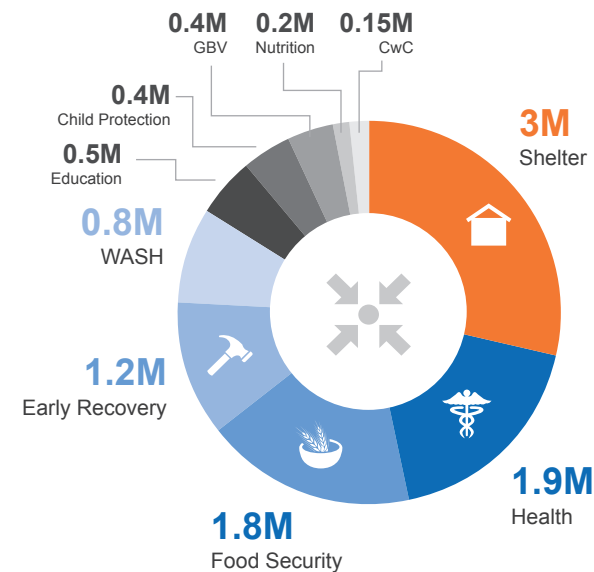

Cluster/Sector Leads/Co-Leads will ensure the monitoring of their respective cluster activities based on their implementation plan that will include expected results and targets. Cluster/Sector Leads/Co-Leads will also take into account the feedback of communities in the monitoring of the implementation of their respective activities. The HCTT will also play a role in monitoring the response and provide appropriate guidance to the Cluster/Sector Leads/Co-Leads.
