The flood areas, prepared by IOM and UNHCR, predate the construction of the shelters and are not included in the current UNHCR hazard analysis.

The high risk landslide areas were produced by the Asian Disaster Preparedness Center at the request of UNHCR, these analyses are under review.

The flood areas, prepared by IOM and UNHCR, provide the construction of the shelters and should be reviewed as indicative only.

Further information on the hazard analyses can be found here: https://data.humdata.org/dataset/cox-s-bazar-refugee-settlement-learning-centers
