Chair	Peter Philips Lukwiya –WASH Cluster Coordinator Ahmed Albohamed- WASH Cluster Sub National Focal Person-MC

Agenda Item	Discussion	Action Points
Agenda	<ul style="list-style-type: none"> • Introduction of Meeting and Participants (Cluster team) • Review of Action Points of Last Meeting Minutes (Cluster team) • WASH Cluster Key updates & Technical Working Group key updates Partners Key updates/ WASH Situation, Response and Coordination challenges (All Partners): • Anbar • Salahideen • Baghdad • Discussing the water crisis in the southern area (Basra) • AoB 	
Introduction & endorse last meeting minutes	Partners introduced themselves and endorsed the meeting minutes of last meeting	Upload minutes of last meeting to HR Info
Review of Action Points	<p>Highlighted/Pending Action Points:</p> <ul style="list-style-type: none"> • Sharing results of the multi-sectoral assessment to understand the situation and interact with the government to help resolve the problem in Basra. • Discussing the outputs of MSNA in order to help develop the 2019 HRP. • Sharing any updates about the Camp Consolidation and Camp Closure for future planning. • Sharing partners' updates about the funding position in the humanitarian portfolio. • JF to keep updating the cluster on SAD Tikrit-south camps. 	<ul style="list-style-type: none"> • UNICEF made a scoping mission on 26-28 August to Basra and other 3 governorates to evaluate the current situation reflecting WASH, Livelihood and health issues, this report may be shared with WASH partners, WASH cluster emphasized that INGO rapid assessment should be more comprehensive Not limited with one direction such technical matters.

- Upkeep of the WTP TWG, challenges and expandability.
- Updates for WASH in schools by partners.
- Bacteriological Water Quality Monitoring – any partner taking action in this regard?
- ActivityInfo updating – we can still do better in reflecting our work.
- Assessment Registry – your contribution is important!
- Update about the Severity Map.

- MSNA for 2019 process started a while ago and timeline shared.
Work is ongoing for developing this, to complete which mapped all areas in Iraq, needs assessment and severity mapping have been done where the needs are higher. Now, at the clusters level, the humanitarian profile is being finalized which specifies the categories of people who are in needs (IDPs, Returnees, Refugees, vulnerable residents in newly accessible areas and poor host community) and then can put the final numbers for each category. Categorization of the targeted people will be discussed with the cluster partners for review, after that the HNO for 2019 will be finalized. That will set us to another level of developing the HRP where we will call all WASH partners together in one workshop to present our HNO and draft cluster strategy for 2019 to go line by line of WASH response activities for 2018-2019.
- Camp Consolidation and Camp Closure are still not clear CCCM cluster should provide us with the most updated case scenario to support WASH ahead planning.
- Many Partners have funding to support returnees' areas with a low focus on camps due to Consolidation and Closure possibility,
- Regarding Basra WASH cluster don't consider this case as emergency therefore, no allocation for pool fund for this intent matter.

- JF updated that Shahama camps 1/126HHs and 2/458HHs lack of fuel supply that affects water provision, and the governmental power is with low voltage, voltage regulator needed to fix this matter.
Eshaki camp 54HHs needs support with Hygiene Kits.
- No update regarding TWG, Contact NRC focal point with this Regards Eng Mohammed Saeed.
- WASH partners agreed to update with WG Anbar-SAR and to be shared with cluster.
- WASH cluster emphasized that contact with DOW and DOH to work on Bacteriological Water Quality Monitoring and to be shared with partners.
- WASH cluster emphasized that updating WASH activities info is really important to reflect WASH partners' intervention on activity mapping that may support the partners to take a place in most Active WASH actors list.
- WASH Cluster confirm that Assessment registry by WASH partners adding key information about WASH needs/Gaps in each target areas with help developing HNO, RNA Monthly and Weekly updates by WSCs in Anbar, Salah al Din and Baghdad can be bilaterally requested by IMO.
- Severity Map can only be developed with partners inputs therefor once again sharing your data of information is the key for accurate Severity Map.

<p>WASH Cluster Partner Key updates & Technical Working Group key updates</p>	<ul style="list-style-type: none"> • No update regarding TWG, Contact NRC focal point with this Regards Eng Mohammed Saeed. <p>Anbar:</p> <p>RI:</p> <ul style="list-style-type: none"> • Garbage collection campaigns will be end on 31 Oct 2018 in 5 locations Kilo18-Khaldiah-AFF-HTC-Bizabiz camps gap to be fill be any interested partners. • Rehabilitated 2 WCU with 200m3/h in Ramadi. • Ahead plan <ul style="list-style-type: none"> A-Distribute 552 trash bins with different sizes.
