# Cholera Response. DTCs and ORCs Gap

Creation date: 20-09-2021 Source: Health Cluster Feedback: khanmu@who.int The boundaries and names shown and the designations used on this map do not in The health service utilization is often 0.5 - 2.5 new consultations per person per year in stable populations. During a humanitarian complex emergency, the number of visits an individual accesses healthcare services is defined as consultations/visits by healthcare providers. This is usually calculated as an average of 2 visits per person per year. Source: SPHERE Standard Guideline Version 2 ccc The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the Health Cluster.
