Over 12,800 persons have been verified through the Government of Bangladesh and UNHCR joint verification exercise, as of 31 July. Recent dry weather has allowed for increased risk mitigation works as well as shelter upgrades and refugee relocations in the camps. A recent report on health facilities cited medical waste management as a key gap. Emergency water quality surveillance guidelines are under review to improve community engagement on monitoring. Space for emergency evacuations and sustainable relocations remain topline needs. Funding gaps continue to limit capacity.
