2019 Response Highlights

- 35,828 households have received emergency shelter solutions while 12,090 households received reinforced/transitional shelter solutions.
- 29,927 households reached through improved, basic and complimentary NFI kits.
- 93,374 eligible individuals biometrically registered since January 2019.
- 1,500 households reached through Cash/Voucher for Shelter support.

August 2019 Overview:

- The month of August saw continued population movements across Borno and Adamawa states with a total of 4,021 arrivals and 13,152 departures being recorded across various tracking locations in Borno and Adamawa. The highest arrivals were recorded in Bama (2,302), Gwoza (1,281), Nganzai (1,130), Dikwa (1,115), Magumeri (1,013) alone (DTM ETT August 2018). The highest arrivals were recorded in Bama (2,302), which affected host communities with 19,106 arrivals and 3,825 departures recorded in August.

Challenges:

- Due to record high heavy rainfall that occurred in August, widespread flooding and damages were reported in many areas in BAY states mainly in Maiduguri, Jere, Dikwa, Monguno LGAs, etc. The reports indicated that the storm affected 13,181 households and forced families to leave their homes and settle temporarily in other locations. Based on the partners reports over 13,181 shelters were either partially or completely damaged. Isolated NFI items have also been depleted as households registers much loss of properties especially mattress, blankets, etc.

- In addition, the huge gaps of shelter in 13 locations with 75 sites, the major delaying factor is the availability of space for partners to construct shelters for the IDPs. The situation of about 366 households of IDPs without shelter and 8,229 households sharing with relatives and friends as sector partners await land provision or approval from the military or government to provide land for shelter construction. Major concerns and challenges with CCCM activities remains shelter, as observed and raised by the site facilitators is the inability of the makeshift Shelter type to withstand the wrath of the rains and winds. These makeshifts are worn out and requires tarpaulin to strengthen the resilience against the series of rainfall. A difficult decision was made by one of the sector partners to halt the construction of 400 transitional Shelters targeting IDPs staying in highly waterlogged areas temporarily.

Response:

- CCCM (DMS activities continued in 143 camps and camp-like settings, hosting 761,260 individuals. CCCM activities in 8 new camps by National NGOs were reported hosting 16,658 individuals. Reception centre management continued in 7 reception centres across Bama, Ngala, Monguno, Dikwa, Groove and Konduga LGAs ensuring provision of services to new arrivals. To continue enhanced access to humanitarian assistance, biometric registration of 5,588 eligible individuals, bringing the total biometrically registered since January to 93,374. Site Facilitators (SF) across all sites in BAY states have tirelessly provided support to the affected population through monitoring and engaging the community in the construction of local pathways, draining of rain water and relocation of affected shelters. Hence, important progress was made through providing and distributing of mitigation tools such sand bags, hand-pumps, trips of sand and many more basic flood mitigation tools for the affected population. More efforts have been put by the active sector Partners in sensitizations, campaign awareness on personal hygiene and environmental hygiene to the community at large. A total of 240 complaints vis-a-vis the use of complaints desk, suggestion boxes and voice recorders across sites with access to site faciliation were received. Furthermore, in order to enhance coordination in camps and camps-like settings, the sector through its partners have engaged in a monthly site level coordination meeting and a sub-sector level meeting in accessible areas. In response to the needs resulting from heavy rainfall and secondary displacement, partners assisted 8,414 households with emergency shelter solutions including construction of communal and emergency shelters as well as distribution of emergency shelter kits across Bama, Dambo, Groove, Jere, Kunduga, Mafra, Magumeri, Maiduguri, Mongono and Ngala LGAs of Borno State bringing the total number of household reached to with emergency shelter assistance to 35,828 since January 2019. 577 households receiving housing repair interventions bringing total assistance to 7,878. NFI partners mainly targeting the most vulnerable newly displaced and rainy season affected households in August reached 3,619 households with NFI kits mainly in Damaturu, Dikwa, Groove, Jere, Kaga, Kunduga, Maiduguri, Monguno and Ngala LGAs in Borno and Adamawa State, bringing the total households assisted since January 2019 to 29,927.
