**2019 Response Highlights**

- 27,414 households have received emergency shelter solutions while 11,513 households received reinforced/transitional shelter solutions.
- 26,308 households reached through improved, basic and complimentary NFI kits.
- 87,786 eligible individuals biometrically registered since January 2019.
- 1,500 households reached through Cash/Voucher for Shelter support.

**July 2019 Overview:**

The month of July saw continued population movements across Borno and Adamawa states with a total 8,421 arrivals and 2,944 departures being recorded across various tracking locations in Borno and Adamawa states with the highest arrivals being recorded in Ngala LGA (1,997 individuals), all of whom went to Arabic village camp. Other LGAs that recorded arrivals include Gwoza (812), Bama (748), Askira / Uba (649), Damboa (638), Madagali (385), Biu (342) and Monguno (315). These arrivals included some from neighbouring countries of Cameroon, Republic of Niger (208) and Chad (183).

**Challenges:**

As the rainy season continues, strength and durability of shelters constructed by partners has been strongly tested mostly due to the strong winds that accompany the rain. In July, 2,076 damages to shelters and were recorded across a number of LGAs including Dikwa, Jere, Mafa, Maiduguri and Monguno in Borno state affecting more than 10,380 individuals. This further exacerbates and adds onto the existing caseload of shelter needs that need to be met for new arrivals and replacement and repair of shelters that have exceeded their lifespan. Camp-based shelter maintenance and site management committees continued to support repair efforts, in addition to improving drainage and upgrading sites vulnerable to flooding while shelter partners continue to closely monitor damage to shelters and regular shelter repairs and reinforcements are ongoing. There’s still need for NFI assistance by more than 8,000 households that include the old case load that haven’t received NFI kits yet due to partners capacity and new arrivals coupled with dwindling stocks in the warehouses and those expected to be prepositioned for stockingpile making the numbers of those in need to keep accumulating making the request for NFI the second most requested humanitarian service by IDPs. Road access due to the rainy season and lack of additional land for construction of land to decongested camps and reception centers remains the biggest challenge affecting shelter and NFI partners and program activities.

**Response:**

CMMC (DMS) activities continued in 136 camps and camp-like settings, hosting 732,366 individuals, with partners closely monitoring CMMC activities to ensure stronger focus on community participation is ongoing with 580 awareness and sensitization outreach campaigns to address the need for information and practical knowledge on identifying, referring and preventing floods related diseases being carried out in collaboration with SEMA, Community leaders and other implementing partners. CMMC Rapid response teams made up of community members and sector partners were set up to carry out rapid impact assessments on rain related occurrences and disease outbreak while distribution of tools for flood prevention and mitigation continued including trainings on how to use the provided tools. 102 households comprising of 1882 individuals, part of new arrivals relocated to Damboa in May 2019 following military operations, were voluntarily relocated to the new communal shelter site in Damboa. Reception centre management continued in 7 reception centres across Bama, Dikwa, Gwoza, konduga, Monguno and Ngala LGAs ensuring provision of services to new arrivals. To continue enhanced access to humanitarian assistance, biometrically registration of 11,755 eligible individuals, bringing the total registered since January to 87,786 individuals. In response to shelter damages due to the rainy season and existing shelter needs, partners assisted 4,802 households with emergency shelter solutions including construction of communal and emergency shelters, and distribution of emergency shelter kits across Bama, Damboa, Gwoza, Konduga, Maiduguri, Monguno and Ngala LGAs of Borno State bringing the total number of households reached with emergency shelter assistance to 27,414 since January 2019. 3,312 households received housing repair interventions and 3,816 households received transitional shelter solutions bringing the total assisted to 7,311 and 4,212 households respectively. NFI partners mainly targeting the most vulnerable newly displaced and rainy season affected households in July reached 2,962 households with NFI kits mainly in Bama, Damboa, Jere, Kala Balge, Maiduguri and Ngala LGAs of Borno state, bringing the total households assisted since January 2019 to 26,308 households.
