2019 Response Highlights

- 32,612 households have received emergency shelter solutions while 4,385 households received reinforced/transitional shelter solutions.
- 33,246 households reached through improved, basic and complimentary NFI kits.
- 76,031 eligible individuals biometrically registered since January 2019.
- 1,500 households reached through Cash/Voucher for Shelter support.

June 2019 Overview:

The month of June saw continued population movements across Borno and Adamawa states with a total 10,153 new arrivals, almost thirty percent less compared to those recorded in May, and 3,753 departures being recorded across various tracking locations. The highest number of arrivals were recorded in Borno State: Askira/Uba LGA (1,305 individuals) and Bama LGA (1,149), of which 75 percent went to GSSS camp and the rest to Banki camp. Other LGAs that recorded arrivals were Madagali (897) in Adamawa State and Gwoza (896), Damboa (737) and Ngala (720) in Borno State. These arrivals included people from neighbouring countries of Cameroon (1,261 individuals), Republic of Niger (519) and Chad (21). Additionally, 38 individuals were registered as departing to the Republic of Niger.

Challenges:

As the rainy season continues, flooding and windstorms were reported in various LGAs including Damboa, Mafa and Maiduguri that caused damage to shelters, shovels and latrines, affecting 4,414 households. This further exacerbates and adds onto the existing caseload of shelter needs that need to be met for new arrivals and replacement/repair of shelters that have exceeded their lifespan. Camp-based shelter maintenance and site management committees supported repair efforts, in addition to improving drainages and upgrading sites vulnerable to flooding while shelter partners continue to closely monitor damage to shelters and regular shelter repairs and reinforcements are ongoing. Securing viable land for the construction of additional shelters to decongest camps and reception centres still continues to be a challenge. As of June, some 311,067 individuals require relocation to new sites, as 40 per cent of camps in Borno State are overcrowded. This is despite the progress made by the Sector in obtaining additional land in Monguno LGA, Borno State for the construction of emergency shelters with the local authorities signing a letter of agreement authorising the use of the land for additional shelters and the land owners agreeing. The land is expected to be available for use starting in July. Additional land is still urgently required to relocate about 141,298 individuals currently living in severely crowded camps and reception centres in Borno state, mostly in Bama, Maiduguri, Monguno, Ngala and Pulka.

Response:

In June, 1,475 households received NFI kits that include basic and essential household items, including sleeping mats, blankets, jerry cans, soap, water disinfection tablets, sanitary pads and kitchen sets mainly in Damboa, Gubio, Gwoza, Jere, Maiduguri and Monguno LGAs of Borno State and Yola South LGA of Adamawa state, bringing the total households assisted since January 2019 to 33,246 households. In response to the influx of new arrivals across various locations, Shelter partners constructed 36 partitioned communal shelters, each of which holds 16 households, in Damboa, Gubio, Maiduguri and Pulka (Gwoza LGA) of Borno State to accommodate a total of 576 households. Additionally, one communal shelter with a capacity of 16 households per shelter was constructed in Damboa. Partners are also rehabilitating six existing buildings in Bama LGA and five in Ngala LGA with the capacity to house 152 households and 56 households respectively. A total of 3,991 households received emergency shelter support including construction of communal and emergency shelters, and distribution of emergency shelter kits across Bama, Damboa, Dikwa, Gubio, Jere, Kaga, Magumeri, Maiduguri, Monguno and Ngala LGAs of Borno State. This brings the total number of households reached with emergency shelter assistance to 22,612 since January 2019. 3,236 households received housing repair interventions and 138 households received transitional shelter assistance bringing the total assisted to 3,989 households and 396 households respectively since January 2019.

CCCM (DMC) activities continued in camps with partners closely monitoring CCCM activities to ensure stronger focus on community participation. Site facilitation in 156 sites, hosting 732,366 individuals, is ongoing with an emphasis on Focus Group Discussions (FGDs), complaints and feedback mechanisms, community sensitizations and household-to-household engagements. Partners continued to distribute tools for flood prevention and mitigation including trainings on how to use the tools provided, in camps across Bama, Damboa, Dikwa, Jere, Konduga, Maiduguri, Mafa, Monguno, Ngala and Pulka LGAs of Borno State. In addition, drainages in some of these locations were constructed and/or cleaned to reduce the impact of flooding. To further enhance access to humanitarian assistance, CCCM partners biometrically registered 20,851 eligible individuals biometrically, bringing the total registered since January to 26,031 individuals.
