OVERVIEW

The report of food insecurity classification according to the IPC1 published in October 2017 by CNSA2 ranked the departments of Nord-Est and the mountainous areas of Grand'Anse in crisis phase while the rest of the country was classified in stress phase. The population in crisis or emergency was estimated at around 1.32 million in the period of October 2017 to February 2018. The report predicted a deterioration of the food security situation for the period of March to June 2018 in some zones because of the lean period. As a result, in addition to the two zones classified in crisis phase during the previous period (October 2017 to February 2018), the coastal communes of Grand'Anse would also go into crisis phase.

The bulletin “food basket and conditions of food security in Haiti” published by CNSA in April 2018, indicated an improvement in the food security situation from May in certain zones because of the beginning of the spring campaign harvests. At the same time, a deterioration of the food security situation has been observed in the Centre department because of the drought which has considerably reduced yields of the winter season - particularly in the Haut-Plateau - on one hand and on the other hand because of the tightening of border controls. The bulletin also reported an average increase of about 8.6% in the value of the food basket in the first quarter of 2018 compared to the first quarter of 2017.

* The number of beneficiaries of school feeding accounts for a large proportion of the number of people reached.
STRATEGIC OBJECTIVES AND ACHIEVEMENTS* (Jan-Apr 2018)

**OBJECTIVE 1**
Improve the availability of and access to food for most vulnerable men and women, especially malnourished boys and girls under five and, pregnant and lactating women.

**INDICATORS**
Number of women and men receiving food assistance
- Targeted: 930k
- Reached: 39k

Number of children benefiting from school feeding activities
- Targeted: 425k
- Reached: 425k

**OBJECTIVE 2**
Strengthen the resilience-building of vulnerable populations to natural disasters, food and nutrition crises and support the restoration of livelihoods and emergency agricultural production.

**INDICATORS**
Number of households receiving seeds and planting materials
- Targeted: 45k
- Reached: 1.2k

Number of fishery households receiving fishing equipments
- Targeted: 150
- Reached: 5

Number of households benefitting from livestock protection intervention
- Targeted: 150
- Reached: 19

Number of farmers supported in the production of quality seeds
- Targeted: 3k
- Reached: 3k

Number of km² of watershed rehabilitated
- Targeted: 3.5k
- Reached: 280

**OBJECTIVE 3**
Support the populations in developing community approaches that facilitate the sustainable recovery of the agricultural sector (agriculture, fisheries, and livestock) and effective management of natural resources.

**INDICATORS**
Number of ha of agroforestry systems restored, planted and in production
- Targeted: 150
- Reached: 5

Number of vulnerable people involved in the income generating activities related to food conservation and processing.
- Targeted: 3.5k
- Reached: 28%

Number of Village Savings and Loan Associations (VSLA) set up
- Targeted: 150
- Reached: 19

**INDICATORS**
Number of boys and girls
- Boys: 49%
- Girls: 51%

Number of children benefiting from school feeding activities (in thousands)
- Targeted: 25%
- Reached: 12k
