HUMANITARIAN SITUATION

In 2021, humanitarian actors in the Central African Republic provided humanitarian assistance to 1.8 million people. Despite growing insecurity and new risks, including explosive devices, humanitarian actors intensified their response through a multi-sectoral approach, resulting in reduced vulnerabilities and protection of a population increasingly worn out by the conflict.

Since HRP 2020, the humanitarian community has identified eight priority perception indicators to measure the quality of the humanitarian response as experienced by the beneficiaries. Each of the perception indicators relates to one of the three strategic objectives. The table includes the results of a survey conducted between March and August 2021 among 2,600 beneficiaries in Bangui, Bambari, Berberati, Alindao and kaga-Bandoro in relation to the overall targets of the HRP 2021.

NUMBER OF PEOPLE REACHED AND NOT ASSISTED BY PREFECTURE
