

CONTEXTE

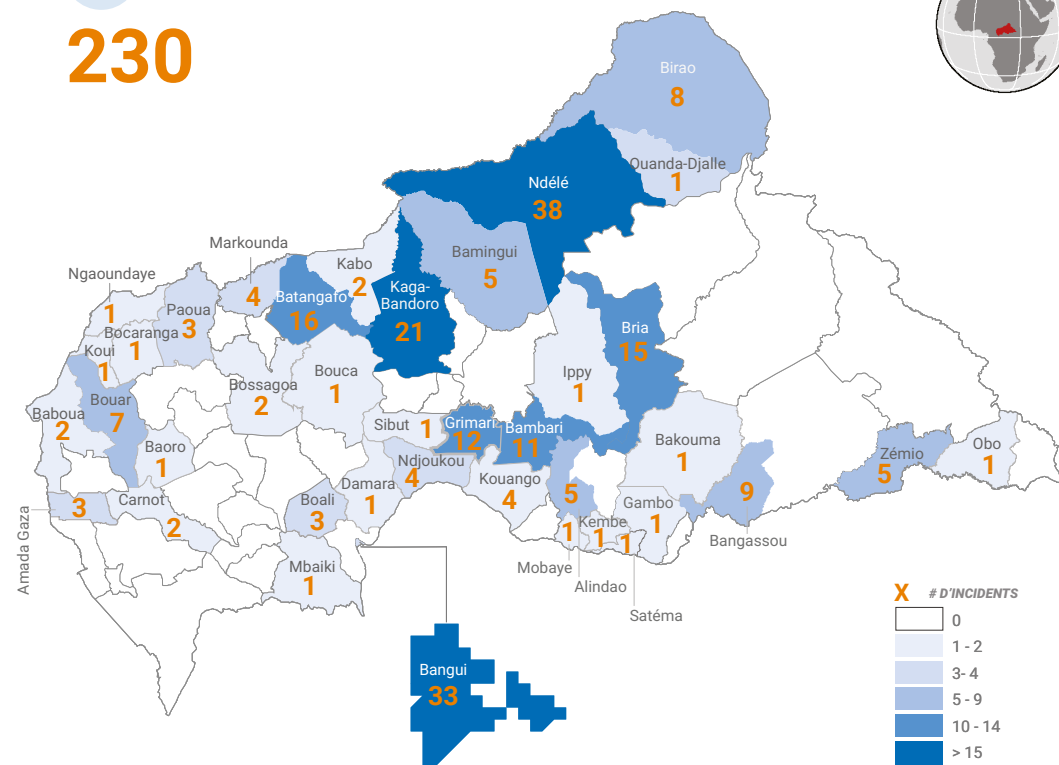

The civilian population is the primary victim of tensions and violence in many regions of the country and the CAR remains one of the most dangerous contexts in the world for humanitarian workers.

Robberies, threats, arbitrary arrests and aggressions continue to hamper the work of humanitarian organisations in the Central African Republic. These acts amount to more than half the total number of incidents recorded in July, followed by restrictions of movement (39%).

38 incidents directly affecting humanitarian personnel or property were recorded in July, similarly to the previous month. In addition, three humanitarian workers were wounded in July.
