• Between Jan-Nov 2018, 6.39 million people were reached at least once with some form of humanitarian assistance, including over 686,000 through 19 inter-agency convoys. On average, 3.2 million people received some form of assistance on a monthly basis.
• 44% of this response was delivered to areas of most acute need (which host an estimated 40% of people in need); 44% of the response was delivered, to areas with major needs (which host an estimated 49% of people in need); and 12% of the response was delivered to other areas of lower severity and include life-saving activities (e.g.: vaccination campaigns; nutrition screening and water provision) to reduce excess morbidity and mortality.

**People Reached vs Pin By Severity Level**

- Severity <3
  - Pin: 5.2M
  - Reach: 2.8M
- Severity =3
  - Pin: 6.4M
  - Reach: 2.8M
- Severity >3
  - Pin: 1.4M
  - Reach: 0.77M

**Communities reached by severity of needs & access status**

- **Communities Reached**
  - At least by one sector: 2,848
  - Communities reached: 49.8%
  - Communities for scaled up advocacy & programming: 50.2%

*People reached is the number of people provided with humanitarian assistance by one or more sectors (Food & Agriculture, ERL (Direct), WASH (Life-Saving), NFI (Core), Shelter, Education, and Nutrition) taking the highest sector per community. People reached does not necessarily mean that all of their humanitarian needs are fully covered. The inter-sector and sector analysis is conducted with the June severity scale.*

**Limitations:** The reporting of "people reached" does not convey the type, scale and quality of assistance and services people in need have received. The information does not include the Syrian Arab Red Crescent assistance that is not funded by the UN and INGOs. The data does not reflect International Committee of the Red Cross (ICRC) assistance.
SECTOR OVERVIEW

- Between Jan-Nov 2018, there were over 4.6 million protection interventions with 73% of the protection response delivered to areas of most acute need.
- Around 2.9 million people received food assistance at least once – with 51% of the response in areas of most acute need and a further 42% in areas of major needs.
- 69% of education assistance, 65% of nutrition assistance and 50% of the NFIs response were to areas of most acute need.
- There were over 9.14 million medical procedures during the reporting period, with 24% of the response in areas of most acute need and 43% in areas of major needs. Health facilities in areas of lower severity of need, such as in governorate capitals, also provide key health services to people from high severity need areas. Same applies for protection facilities.

Reach by Sector by Severity

Food and Agriculture
2.9m beneficiaries

Nutrition
1.57m beneficiaries

NFI
4.17m beneficiaries

Shelter
347k beneficiaries

Overview of humanitarian response from within Syria

January-November 2018

**Education**
- 2.1M beneficiaries

**WASH**
- 3.35M beneficiaries
  - 5.49M beneficiaries reached through support to WASH facilities

**ER&L**
- 203k beneficiaries

**Health**
- 9.14M Medical procedures
  - 6.27M Treatment courses

**Protection**
- 4.67M Interventions

Notes:
- Food assistance includes food baskets, bread/wheat flour, cash/vouchers lifescaving and emergency food rations. As well as agricultural inputs, small-scale food production, livestock asset restoration, animal health, income generating activities, provision of services and rehabilitation of relevant infrastructure.
- Protection figures represent the total number of distinct protection interventions conducted through the sector’s prevention, response and capacity building activities. The overall protection interventions in this product also include achievements in Child Protection (CP), Gender-Based Violence (GBV) and Risk Education (RE).
- For health, given the challenges the sector faces in measuring individual beneficiaries, the indicator for the number of medical procedures is used as an aggregate indicator that serves as a proxy measure for overall progress in health service delivery in Syria (medical procedures are an aggregate indicator that includes outpatient consultations at primary health care units and hospitals, number of referral cases, mental health consultations, trauma cases, persons with disabilities supported and deliveries by a skilled birth attendant).
