The Impact on the Provision of Health Care

Provision of health care is seriously affected. As of 18 February, some 77 health services; hospitals, primary health care centres, specialized care centres, and mobile clinics, have been suspended in Idleb and Aleppo governorates since December 1st, 2019. 31 facilities were relocated to another locations, previously employing 191 doctors, 304 nurses and 55 midwives. This means that more than 100,000 medical outpatient consultations are suspended, nearly 11,000 trauma patients are not served and 2,000 major surgeries will not be performed as they normally would in a cycle of four weeks. A handful of the health services that have ceased operations in Idleb, due to areas being depopulated or due to security constraints, are to be relocated.

Since January 1st, they are six incidents of attacks on health services, all of them in the northwest Syria, causing 10 deaths and 31 injuries.
