SITUATION ANALYSIS

In Syria, nine years into the crisis, access to sufficient quantities of safe water remains limited, with increased water quality assurances and support to water systems rehabilitation, operation and maintenance unconditionally needed.

There is a need to maintain the provision of adequate WASH services and supplies for IDPs especially in the northeast and northwest, and to promote transition to more sustainable solutions while acknowledging that more emphasis on IDPs in collective centers and open areas is also needed.

77.5 million required
69.9 million available

90% Funded

RECENT HIGHLIGHTS

During 2019, UNICEF reached over 4.7 million people with improved and sustained access to safe water, and over 1.1 million people through enhanced sanitation services.

WASH in schools reached over 260,000 children including children with disabilities in 238 schools throughout the country.

Moreover, over 1.7 million people were reached through distribution of WASH non-food items (NFIs) including family hygiene kits, soap and aqua tabs.
