

Tropical Cyclone Harold Response

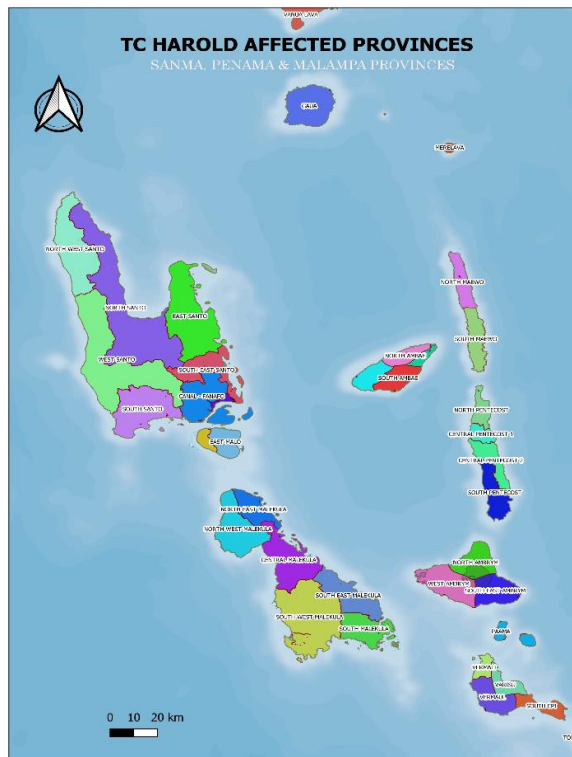

Date: 30th June 2020

SANMA, PENAMA, MALAMPA - VANUATU

TC Harold passed 50-100km north west to south across Santo Island in Sanma, Penama and Malmpa Province as a Category 5 cyclone on the 11th & 13th of April 2020. Destructive winds and heavy rain caused significant damage. This graphic summarises the Government of Vanuatu's response. Many partner agencies supported the response.

Over 80,000 Affected population
Over 22,000 Households

- Over 46,486 Assessed
- Roughly 69% Coverage

NATIONAL WASH INTERVENTIONS

People affected in Sanma, Penama and Malmpa by disasters are generally much more susceptible to illness and death from disease which are related to **inadequate water supplies** and/or **consumption of contaminated water**. Hence, the WASH cluster in collaboration with its partners are working together to ensure all affected communities have immediate access to safe clean water through;

- Quick fixes of damaged water systems including piped systems, and rainwater catchment.
- Emergency water trucking (both on Land and Sea) to communities with no access to safe clean water at all
- Distribution of Jerry cans for safe household water handling and storage.
- Distribution of water filters to health centres, household with disabilities to purify drinking water.
- Chlorination of water system using chlorine in both urban and rural systems to disinfect water and making it safer for consumption.
- Distribution of bottled water by NDMO and Food cluster as part of the food ration
- Testing Water quality using CBT kit to test for the presence of harmful pathogens in urban water systems.
