Medical procedures provided during July 2021, per sub-district

- Medical procedures include sum of outpatient consultations, trauma consultations, mental health consultations, physical rehabilitation sessions, vaginal deliveries, C-sections, and referral cases.

Treatment courses delivered during July 2021, per sub-district

- Treatment courses include medicines, dressings and other supplies delivered directly to health facilities by UN humanitarian actors.

**Number of Medical Procedures**

- 1 - 10,000
- 10,001 - 50,000
- 50,001 - 100,000
- 100,001 - 180,000

**Number of Treatment Courses**

- 1 - 10,000
- 10,001 - 50,000
- 50,001 - 100,000
- 100,001 - 330,000

**Cumulative Reach and PIN by Severity Level**

- **Medical Procedures**
  - Severity <3: 66%
  - Severity =3: 29%
  - Severity >3: 5%

- **Treatment Courses**
  - Severity <3: 49%
  - Severity =3: 43%
  - Severity >3: 2%

- **People in Need (2021)**
  - Severity <3: 52%
  - Severity =3: 42%
  - Severity >3: 6%

**Notes:**
1. Unless otherwise noted, all data is sourced from Whole of Syria 4Ws database, and Severity Scale for 2021 and represents the response during July 2021.
2. Differences in health sector response modalities account for variations in data and overall reach. Turkey cross-border response and NGO response in Northeast Syria works through direct service provision and running of health facilities by health partners while programming delivered from Government of Syria-controlled areas works through both direct service provision and a complementarity approach to support the existing public health system operated by Ministry of Health and Ministry of Higher Education.
3. The health sector uses XB to refer to the Syria Cross-Border Humanitarian Liaison Group (HLG) Coordinated and NES NGO Forum Coordinated Responses and SYR to refer to Syria Humanitarian Country Team (HCT) Coordinated Response.
