Medical procedures provided during June 2021, per sub-district

Medical procedures include sum of outpatient consultations, trauma consultations, mental health consultations, physical rehabilitation sessions, vaginal deliveries, C-sections, and referral cases.

Number of Medical Procedures

- 1 - 10,000
- 10,001 - 50,000
- 50,001 - 100,000
- 100,001 - 220,000

Number of Treatment Courses

- 1 - 10,000
- 10,001 - 50,000
- 50,001 - 100,000
- 100,001 - 780,000

Medical Services by Response Modality

- HRP: Humanitarian Response Plan
- Not HRP

Cumulative Reach and PIN by Severity Level

- Severity <3
- Severity =3
- Severity >3

Differences in health sector response modalities account for variations in data and overall reach. Turkey cross-border response and NGO response in Northeast Syria work through direct service provision and running of health facilities by health partners while programming delivered from Government of Syria-controlled areas works through both direct service provision and a complementarity approach to support the existing public health system operated by Ministry of Health and Ministry of Higher Education.

Notes:

1. Unless otherwise noted, all data is sourced from Whole of Syria 4Ws database, and Severity Scale for 2021 and represents the response during June 2021.

2. The health sector uses XB refer to the Syria Cross-Border Humanitarian Liaison Group (HLG) Coordinated and NES NGO Forum Coordinated Responses and SYR to refer to Syria Humanitarian Country Team (HCT) Coordinated Response.

Date of production: October 14, 2021

**Medical Procedures by Maternal Health Care Response**

- **Outpatient consultations** supported:
  - 1.87M (Out of 10.8M supported in 2021)
  - Under 18: 64% (0.82M), 18 and Above: 36% (1.05M)
- **Trauma consultations** supported:
  - 92.8K (Out of 338K supported in 2021)
  - Under 18: 56% (46.0K), 18 and Above: 44% (46.8K)
- **Mental health consultations** supported:
  - 35.2K (Out of 171K supported in 2021)
  - Under 18: 77% (9.7K), 18 and Above: 23% (25.5K)
- **Physical rehabilitation sessions** supported:
  - 16.5K (Out of 104K supported in 2021)
  - Under 18: 71% (7.0K), 18 and Above: 29% (9.5K)
- **Cases referred for treatment**:
  - 24.3K (Out of 132K supported in 2021)
  - Under 18: 95% (8.0K), 18 and Above: 5% (16.3K)

---

**Ante-Natal Care (ANC) visits**

- **Outpatient consultations** attended by skilled attendants:
  - 8.7K (Out of 59K supported in 2021)
  - Under 18: 96% (902), 18 and Above: 4% (7.8K)
- **C-sections** supported:
  - 3.2K (Out of 2.1K supported in 2021)
  - Under 18: 89% (122), 18 and Above: 11% (3.1K)

- **Ante-Natal Care (ANC) visits**
  - 138.2K (Out of 692K visits in 2021)
  - Under 18: 72% (97K), 18 and Above: 28% (41K)

---

**Immunization**

- Children under 1 year immunized with DPT3
  - 75% (75%): 40.4k (25%)
  - Children under 1 year immunized with MMR2
  - 75% (25%): 44.7k (25%)

---

**Training**

- Healthcare staff trained or retrained
  - 63% (37%): 4.5k
- Community health workers trained or retrained
  - 0% (100%): 0.23k

---

**Facilities refurbished/rehabilitated, MMU/MMT, & Ambulances**

- Health facilities refurbished or rehabilitated
  - 14% (86%): 7
- MMU/MMT
  - 80% (20%): 134
- Functional ambulances
  - 0% (100%): 71
A total of 912,000 COVID-19 vaccine doses were allocated to Syria through COVAX facility (NVDP), the first batch arrived in April 2021, in light with the COVID-19 vaccine roll-out, Health partners in different response areas continue to contribute to Covid-19 response through providing/supporting case management. 286K Covid-19 tests where conducted by the June 26th 2021, with (24%) positivity rate.

As of June 26th 2021, the total number of confirmed cases of COVID-19 in Syria was around 70K (25k in GoS, 18K in NES, and 27K in NWS), with 3.3K associated deaths reported across the country. Out all the confirmed cases, 4.8K (7%) were healthcare workers (21% in GoS, 22% in NES, and 57% in NWS), which make the health care workers among the high vulnerability groups to COVID-19 infection.

Health partners in different response areas continue to contribute to Covid-19 response through providing/supporting case management in the COVID-19 treatment facilities, IPC materials (including PEE) and trainings. In light with the COVID-19 vaccine roll-out, RCCE is also one area where health partners also provide support to raise community awareness on COVID-19 preventive measures and importance of getting vaccinated.

A total of 912,000 COVID-19 vaccine doses were allocated to Syria through COVAX facility (NVDP), the first batch arrived in April 2021, which contained 258,800 (179,300 to GoS, 23,700 to NES and 53,800 to NWS). As of June 2021 a total of 136K people received the first dose of the vaccine (93k in GoS, 7k in NES and 34k in NWS)

As of June 26th 2021, the total number of confirmed cases of COVID-19 in Syria was around 70K (25k in GoS, 18K in NES, and 27K in NWS), with 3.3K associated deaths reported across the country. Out all the confirmed cases, 4.8K (7%) were healthcare workers (21% in GoS, 22% in NES, and 57% in NWS) which make the health care workers among the high vulnerability groups to COVID-19 infection, impacting the quality of services. Lack of funding lead push many health partners to face out support of COVID-19 treatment facilities which will overburden the health system and service delivery in the country.

Dara’s situation has deteriorated since June 24th, 2021, leading to a huge displacement especially among women and children, with Food, water, and medication identified as top priority needs.

Oxygen supplies, capacity expansion, ICU, RCCE, case management, referral services, and PCR testing kits are the main constraints facing health sector for COVID-19 response in Syria, with non-COVID-19 services overwhelmed due to the continuous deployment of health care workers to the COVID-19 response, impacting the quality of services. Lack of funding lead push many health partners to phase out support of COVID-19 treatment facilities which will overburden the health system and service delivery in the country.

Funding continues to be a serious challenge for humanitarian aids in Syria. In the shade of the decision to be taken for the United Nations Security Council resolution (UNSCR) 2533 (2020), donors were obliged to hold the provision of funds before getting a clear image on the way to deliver aids to millions of Syrians.

6 total attacks on health care in Syria were reported in Q2 2021, comparing to 8 and Q1.

**Covid-19 Response**

- **Support to hospital capacity**
  - Non-critical Cases Beds: 73%
  - Critical Cases (ICU) Beds: 27%

- **Personal Protective Equipment** (PPE) support as of June 2021
  - Medical Gloves
  - Medical Masks
  - N95 Masks
  - Protective Gowns

- **Capacity Building** (Health Workers)
  - Covid-19 case management
  - Infection prevention and control (IPC)
  - Mental health Topics
  - GBV topics

**Achievements Against Targets**

**HRP Health Sector Objective 1:** Increase access to life-saving and life-sustaining coordinated, equitable humanitarian health services for those most vulnerable and in need

**Activity 1.1**

Provide essential primary and secondary health care services, including trauma care, and referral
