Medical procedures include sum of outpatient consultations, trauma consultations, mental health consultations, physical rehabilitation sessions, vaginal deliveries, C-sections, and referral cases.

Treatment courses include medicines, dressings and other supplies delivered directly to health facilities by UN humanitarian actors.

Number of Treatment Courses
- 1 - 10,000
- 10,001 - 50,000
- 50,001 - 100,000
- 100,001 - 220,000

2.3 M Treatment courses delivered
2.3 M Medical procedures provided

Number of Medical Procedures
- 1 - 10,000
- 10,001 - 50,000
- 50,001 - 100,000
- 100,001 - 230,000

0.8 M Medical procedures provided during November 2021, per sub-district

As of end of November 2021 based on FTS website

Notes:
1. Unless otherwise noted, all data is sourced from Whole of Syria 4Ws database, and mid-year 2021 Severity scale and represents the response during November 2021.
2. Differences in health sector response modalities account for variations in data and overall reach. Turkey cross-border response and NGO response in Northeast Syria work through direct service provision and running of health facilities by health partners while programming delivered from Government of Syria-controlled areas works through both direct service provision and a complementarity approach to support the existing public health system operated by Ministry of Health and Ministry of Higher Education.
3. The health sector uses XB refer to the Syria Cross-Border Humanitarian Liaison Group (HLG) Coordinated and NES NGO Forum Coordinated Responses and SYR to refer to Syria Humanitarian Country Team (HCT) Coordinated Response.
