

Yemen Humanitarian Fund (YHF) and Central Emergency Response Fund (CERF) jointly provided US\$ 164 million for life-saving assistance in Yemen in 2020. YHF and CERF funding was jointly prioritized by in-country humanitarian actors and targeted people most in need in some of the hardest to reach areas. This funding represented **8 per cent** of the total funding received against 2020 Yemen Humanitarian Response Plan (HRP) and Yemen COVID-19 Response Plan.

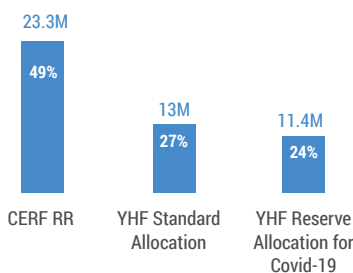

Out of the total \$164 million allocated, **\$90.2 million (55 per cent)** went to NGOs and Red Crescent Societies. This included \$67.4 million in direct funding from YHF and CERF and \$22.8 million in subgranted funding from direct recipients to their implementing partners.

YHF and CERF funding was allocated in a complementary manner and supplemented funding from other sources. For instance, the funding from YHF second Reserve Allocation enabled the provision of allowances for health workers and key COVID-19- response activities, while CERF Underfunded Allocation provided critical funding to underfunded health projects. As a result, the two funds provided a lifeline for the critically overstretched health response in Yemen in 2020.
